## RISK FACTORS

### i. Standard Risk Factors:

- 1) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- 2) As the price/ value/ interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- 3) Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the Scheme.
- 4) The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- 5) The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 50,000 made by it towards setting up the Fund.
- 6) The present Schemes are not guaranteed or assured return Schemes.

### ii. Scheme Specific Risk Factors

The following are the risks associated with investment in Fixed Income securities:

**Interest-Rate Risk:** Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

**Re-investment Risk:** Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

**Basis Risk:** The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

**Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

**Liquidity Risk:** The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

**Credit Risk:** This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

**Liquidity Risk on account of unlisted securities:** The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

**Settlement Risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

#### **Risk Associated with Securitized Debt**

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (“ABS”) or Mortgage Backed Securities (“MBS”). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles /two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default.

The rating agency defines margins, over collateralization and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

- a. Assets securitized and Size of the loan: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b. Diversification: Diversification across geographical boundaries and ticket sizes might result in lower delinquency.

c. Loan to Value Ratio: Indicates how much % value of the asset is financed by borrowers own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.

d. Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitized debt are as follows:

**Prepayment Risk:** This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABS. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

**Reinvestment Risk:** Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

#### **Risks associated with Derivatives Transactions**

**Credit Risk:** The credit risk is the risk that the counter party will default in its obligations and is generally small as in a Derivative transaction there is generally no exchange of the principal amount.

**Interest rate Risk:** Derivatives carry the risk of adverse changes in the price due to change in interest rates.

**Basis Risk:** When a bond is hedged using a Derivative, the change in price of the bond and the change in price of the Derivative may not be fully correlated leading to basis risk in the portfolio.

**Liquidity Risk:** During the life of the Derivative, the benchmark might become illiquid and might not be fully capturing the interest rate changes in the market, or the selling, unwinding prices might not reflect the underlying assets, rates and indices, leading to loss of value of the portfolio.

**Model Risk:** The risk of mis-pricing or improper valuation of Derivatives.

**Trade Execution:** Risk where the final execution price is different from the screen price leading to dilution in the spreads and hence impacting the profitability of the reverse arbitrage strategy.

**Systemic Risk:** For Derivatives, especially OTC ones, the failure of one Counter Party can put the whole system at risk and the whole system can come to a halt.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of Derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

#### **Risk associated with Securities Lending**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

#### **Specific Risk Factors & Special Considerations**

1. Indiabulls Blue Chip Fund is an open ended equity fund investing in Blue Chip – Large Cap companies by market capitalization and thus will carry less risk as compared to a mid cap / thematic equity fund. The underlying companies will be more liquid and also the access to information for these companies is very high as the Institutional ownership in these companies is generally large.
2. The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

3. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
4. As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the Scheme. In view of the above, the Trustees have a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.
5. Investment decisions made by the AMC may not always be profitable.
6. The tax benefits available under the scheme are as available under the present taxation laws and subject to relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unitholder is advised to consult his/her own professional tax advisor.
7. In case of investments in derivative instruments like index futures, the risk/ reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively a new market.
8. Indiabulls Blue Chip Fund may generate returns which are not in line with the performance of the S&P CNX Nifty Index and may arise from a variety of factors including but not limited to:
  - The fund will deploy 0-35% of the net assets by investing in securities other than Large Cap companies in percentages as decided by the investment team from time to time. This will result in the performance of the fund being at variance with the S&P CNX Nifty Index. Also these scrips will normally carry higher risk than Large cap companies
  - Transaction and other expenses, such as but not limited to brokerage, custody, trustee and asset management fees.
  - Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions

The Load Structure prevailing at the time of submission of the STP/ SWP application will apply for all the installments indicated in such application.

The AMC reserves the right to introduce SIP/ STP/ SWP/ Dividend Sweep Facility at any other frequencies or on any other dates as the AMC may feel appropriate from time to time.

**Option to hold units in Demat Form**

In terms of SEBI Circular CIR/IMD/DF/9/2011, dated May 19, 2011, investors have the option to receive allotment of Mutual Fund units in their demat account while subscribing to this scheme. Such units held in demat form shall be fully transferable.

**Demat Facility for SIP Transactions**

Demat option shall be available for SIP transactions. However, the units will be allotted on the applicable NAV as per SID and will be credited to investors demat account on weekly basis on realization of funds.

**Despatch of Redemption Request**

Within 10 working days of the receipt of the redemption request at the authorized centre of the Indiabulls Mutual Fund.

**Dividend Policy**

The Trustee will endeavour to declare the Dividend, subject to availability of distributable surplus calculated in accordance with the Regulations. The actual declaration of Dividend and frequency will inter-alia depend on availability of distributable surplus calculated in accordance with SEBI (MF) Regulations and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the unit holders as to the rate of Dividend nor that will the Dividend be paid regularly.

**Expenses**

**ii. Annual Scheme Recurring Expenses (% of Daily Net Assets)**

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC and other expenses as given in the table below:

The AMC has estimated that up to 2.50%\*\* of the daily net assets of the Scheme will be charged to the Scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the AMC.

Particulars	Expense (% of Daily Net Assets)
Investment Management & Advisory Fee	2.48%
Investor Education & Awareness Fee	0.02%
<b>Total Recurring Expenses</b>	<b>2.50%</b>

\*\*Subject to the maximum ceiling prescribed by SEBI on the basis of daily net assets.

These estimates have been made in good faith as per the information available and estimates made by the Investment Manager/ AMC and are subject to change inter-se or in total subject to prevailing SEBI Regulations. The AMC may incur actual expenses which may be more or less than those estimated above under any head and/or in total and may charge expenses under any of the different heads given under Regulation 52(2) & 52(4) of the SEBI (MF) Regulations (hereinafter called as SEBI Regulations). These expenses shall be subject to the maximum ceiling under the SEBI Regulations. Types of expenses charged shall be as per the SEBI Regulations.

As per Regulation 52(6) of the SEBI Regulations, the maximum recurring expenses (including the Investment Management and Advisory Fees) that can be charged to the respective schemes shall be subject to the percentage limit of daily net assets as given below:

- On the first Rs. 100 crores of the daily net assets – 2.50%
- On the next Rs. 300 crores of the daily net assets – 2.25%
- On the next Rs. 300 crores of the daily net assets – 2.00%
- On the balance of the assets – 1.75%

In addition to the limits specified above, as per Regulation 52(6A) of the SEBI Regulations, the following costs or expenses may be charged to the scheme, namely-

- (a) brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions;
- (b) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from beyond top 15 cities are at least-
  - (i) 30 per cent of gross new inflows in the scheme, or;
  - (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from beyond top 15 cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis as per below formula:

$$\frac{\text{Daily net assets} \times 30 \text{ basis points} \times \text{New inflows from beyond top 15 cities}}{365 \times \text{Higher of (a) or (b) above}}$$

\* 366, wherever applicable.

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities:

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case, the said inflows are redeemed within a period of one year from the date of investment;

The top 15 cities shall mean top 15 cities based on AMFI data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

(c) Additional expenses, not exceeding 0.20 per cent of daily net assets of the scheme, incurred towards different heads mentioned under Regulations 52(2) and 52(4) of the SEBI Regulations.

Subject to the SEBI Regulations and this document, expenses over and above the prescribed ceiling will be borne by AMC. The AMC may charge the Mutual Fund with investment and advisory fee as prescribed in the SEBI Regulations from time to time and as permitted by the Investment Management Agreement.

The Direct Plan shall have lower expense ratio compared to the Existing Plan and no commission shall be paid out of the Direct Plan.

The current expense ratios will be updated on the AMC website viz. [www.indiabullsamc.com](http://www.indiabullsamc.com) within two working days mentioning the effective date of the change.

**Provisions Relating to Service Tax:**

1. Service tax on investment and advisory fees shall be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52 of the SEBI Regulations.
2. Service tax on other than investment and advisory fees, if any, shall be charged to the scheme within the maximum limit of TER as per Regulation 52 of the SEBI Regulations.
3. Service tax on exit load, if any, shall be paid out of the exit load proceeds and exit load net of service tax, if any, shall be credited to the scheme.
4. Service tax on brokerage and transaction cost paid for asset purchases, if any, shall be charged within the limit prescribed under Regulation 52 of the SEBI Regulations.

**Waiver of Load for Direct Applications**

Pursuant to SEBI Circular no. SEBI/IMD/CIR No.4/ 168230/09 dated June 30, 2009 no entry load will be charged for purchase / additional purchase / switch-in/ SIP/ STP transactions accepted by the Fund.

The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered Distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

**Transaction Charges**

In accordance with SEBI Circular No. Cir/IMD/DF/13/2011 dated August 22, 2011, the distributor (**who has opted in based on type of product**) would be allowed to charge the existing investor a sum of Rs. 100 per subscription of Rs 10,000 and above as transaction charge and Rs. 150 to the first time investor.

No charge can be made for investments below Rs. 10,000. The transaction charge (Rs100/ Rs150) if any, will be deducted by the AMC from the subscription amount and paid to the distributor; and the balance amount will be invested in the Scheme. Thus units will be allotted against the net investment.

There would be no transaction charge on

- (a) transactions other than purchases/ subscriptions relating to new inflows, &
- (b) direct transactions with the Mutual Fund.

The transaction charges are in addition to the existing commission permissible to the distributors.

In case of SIPs, the transaction charge shall be applicable only if the total commitment through SIPs amounts to Rs.10,000/- and above. In such cases the transaction charge shall be recovered in 3 instalments.

**Tax Treatment for the Investors' (Unitholders)**

Investors are advised to refer to the paragraph on Taxation in the 'Statement of Additional Information' and to consult their own tax advisors with respect to their tax liability and other implications arising out of their participation in the scheme.
