RISK FACTORS

i. Standard Risk Factors:

- 1) Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- 2) As the price/ value/ interest rate of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- 3) Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the Scheme.
- 4) The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- 5) The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 50,000 made by it towards setting up the Fund.
- 6) The present Schemes are not guaranteed or assured return Schemes.

ii. Scheme Specific Risk Factors

The following are the risks associated with investment in Fixed Income securities:

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risk Associated with Securitized Debt

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (“ABS”) or Mortgage Backed Securities (“MBS”). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles /two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default.

The rating agency defines margins, over collateralization and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

- a. Assets securitized and Size of the loan: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b. Diversification: Diversification across geographical boundaries and ticket sizes might result in lower delinquency.
- c. Loan to Value Ratio: Indicates how much % value of the asset is financed by borrowers own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.
- d. Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitized debt are as follows:

Prepayment Risk: This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABS. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

Reinvestment Risk: Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

Risks associated with Derivatives Transactions

Credit Risk: The credit risk is the risk that the counter party will default in its obligations and is generally small as in a Derivative transaction there is generally no exchange of the principal amount.

Interest rate Risk: Derivatives carry the risk of adverse changes in the price due to change in interest rates.

Basis Risk: When a bond is hedged using a Derivative, the change in price of the bond and the change in price of the Derivative may not be fully correlated leading to basis risk in the portfolio.

Liquidity Risk: During the life of the Derivative, the benchmark might become illiquid and might not be fully capturing the interest rate changes in the market, or the selling, unwinding prices might not reflect the underlying assets, rates and indices, leading to loss of value of the portfolio.

Model Risk: The risk of mis-pricing or improper valuation of Derivatives.

Trade Execution: Risk where the final execution price is different from the screen price leading to dilution in the spreads and hence impacting the profitability of the reverse arbitrage strategy.

Systemic Risk: For Derivatives, especially OTC ones, the failure of one Counter Party can put the whole system at risk and the whole system can come to a halt.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of Derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk associated with Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

In case the sweep amount is less than Rs. 500/-, the dividend amount shall be reinvested in the Source scheme. This facility shall be processed on the record date of the dividend declared under the Source Scheme. Further, this facility shall not allow for switch of partial dividend or switch of dividend to multiple schemes. In case the investor fails to specify his preference of Option for the Target scheme into which the dividend has to be swept, Sweep-in amount shall be invested in default plan / option as mentioned in Scheme Information Document (SID) of Target scheme.</p>

The Load Structure prevailing at the time of submission of the STP/ SWP application will apply for all the installments indicated in such application.

The AMC reserves the right to introduce SIP/ STP/ SWP/ Dividend Sweep Facility at any other frequencies or on any other dates as the AMC may feel appropriate from time to time.

Option to hold units in Demat Form

In terms of SEBI Circular CIR/IMD/DF/9/2011, dated May 19, 2011, investors have the option to receive allotment of Mutual Fund units in their demat account while subscribing to this scheme. Such units held in demat form shall be fully transferable.

Demat Facility for SIP Transactions

Demat option shall be available for SIP transactions. However, the units will be allotted on the applicable NAV as per SID and will be credited to investors demat account on weekly basis on realization of funds.

Despatch of Redemption Request

Within 10 working days of the receipt of the redemption request at the authorized centre of the Indiabulls Mutual Fund.

Dividend Policy

The Trustee will endeavour to declare the Dividend, subject to availability of distributable surplus calculated in accordance with the Regulations. The actual declaration of Dividend and frequency will inter-alia depend on availability of distributable surplus calculated in accordance with SEBI (MF) Regulations and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the unit holders as to the rate of Dividend nor that will the Dividend be paid regularly.

COMPUTATION OF NAV

The Net Asset Value (NAV) of a mutual fund is the price at which units of a mutual fund are bought or sold. It is the market value of the fund after deducting its liabilities. The value of all units of a mutual fund portfolio are calculated on a daily basis, from this all expenses are then subtracted. The result is then divided by the total number of units the resultant value is the NAV. NAV is also sometimes referred to as Net Book Value or book Value.

Calculation of NAV Mutual fund assets usually fall under two categories – securities & cash. Securities, here, include both bonds and stocks. Therefore, the total asset value of a fund will include its stocks, cash and bonds at market value. Dividends and interest accrued and liquid assets are also included in total assets. Also, liabilities like money owed to creditors, and other expenses accrued are also included.

The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

Formula to calculate Net Asset Value (NAV) = (Assets – Debts) / (Number of Outstanding units)

Here: Assets = Market value of mutual fund investments + Receivables + Accrued Income

Debts = Liabilities + Expenses (accrued) the market value of the stocks & debentures.

The NAV shall be calculated up to four decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Plan/Option. The NAVs of the Growth Option and the Dividend Option will be different after the declaration of the first Dividend.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated for all the Business Days.

Rounding off policy for NAV:

To ensure uniformity, the Mutual Fund shall round off NAVs up to four decimal places & the fourth decimal will be rounded off to the next higher digit if the fifth decimal is or more than 5 i.e., if the NAV is 10.13576 it will be rounded off to 10.1358.

However, there can be no assurance that the investment objective of the scheme will be achieved.

Sale Price:

Sale price is a price at which the fund house sells / offers mutual fund units to investors; this is nothing but the NAV of the respective Scheme of Mutual Fund. For investor who wants to invest in Mutual Fund, the units are offered at NAV of the respective Scheme of Mutual Fund.

For Example – If investor A wants to invest Rs. 5,000/- in XYZ Scheme of Mutual Fund. The NAV of Mutual Fund Scheme XYZ is Rs. 15 per unit. Investor's Investments & Mutual Fund unit allocation in Scheme XYZ is calculated as follows:-

Investment of Investor A = Investment Amount / Sale Price

$$= 5,000 / 15$$

$$= 333.3333 \text{ units}$$

This means investor A will be allocated **333.3333 units** of Mutual Fund Scheme XYZ.

Repurchase Price:

Repurchase price is a price at which fund house repurchases the mutual fund units back from the investor. For investor who wants to redeem his mutual fund units, the units are repurchased at respective scheme NAV less Exit Load (If Applicable)

For Example - If Mutual Fund Scheme XYZ is having NAV of Rs. 15 & Exit Load of 1% then the repurchase price would be calculated as follow:

$$\begin{aligned} \text{Repurchase Price} &= \text{NAV} * (1 - \text{Exit Load } \%) \\ &= 15 * (1 - 0.01) \\ &= 14.8500 \end{aligned}$$

This means the investor will realise **Rs. 14.8500** per unit if he redeems from Mutual Fund Scheme XYZ.

In case of no exit load the NAV & repurchase price are same.

ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC and other expenses as given in the table below:

Expense Head	% of daily Net Assets
(a) Investment Management and Advisory Fees	Upto 2.25%

Additional expenses under regulation 52 (6A) (c)	Upto 0.20%
Additional expenses for gross new inflows from specified cities**	Upto 0.30%

* The AMC may charge expenses under any one or more of the expense heads mentioned from (a) to (n) above subject to the maximum total expense ratio permissible under Regulation 52(6) (c) (i) and 52(6) (a).

** expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from beyond top 30 cities are at least-

(i) 30 per cent of gross new inflows in the scheme, or;

(ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from beyond top 30 cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis as per below formula:

$$\frac{\text{Daily net assets} \times 30 \text{ basis points} \times \text{New inflows from beyond top 30 cities}}{365^* \times \text{Higher of (a) or (b) above}}$$

Provided that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities:

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case, the said inflows are redeemed within a period of one year from the date of investment;

The top 30 cities shall mean top 30 cities based on AMFI data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

Additional expenses, not exceeding 0.20 per cent of daily net assets of the scheme, incurred towards different heads mentioned under Regulations 52(2) and 52(4) of the SEBI Regulations. The AMC shall not be eligible to charge the aforementioned additional expenses, wherein exit load is not levied / not applicable in the scheme

Subject to the SEBI Regulations and this document, expenses over and above the prescribed ceiling will be borne by the AMC. The AMC may charge the Mutual Fund with investment and advisory fee as prescribed in the SEBI Regulations from time to time and as permitted by the Investment Management Agreement. The Annual Scheme Recurring Expenses as mentioned in the Table above shall be charged according to the following slabs:

On the first Rs. 100 crores of the daily net assets – 2.25%

On the next Rs. 300 crores of the daily net assets – 2.00%

On the next Rs. 300 crores of the daily net assets – 1.75%

On the balance of the assets – 1.50%

The Direct Plan shall have lower expense ratio compared to the Regular Plan and no commission shall be paid out of the Direct Plan. It is estimated that the expense ratio in Direct Plan will be lower by a minimum of 0.5% compared to the expense ratio of Regular Plan.

The current expense ratios will be updated on the AMC website viz. www.indiabullsamc.com on daily basis under a separate head 'Total Expense Ratio of Mutual Fund Schemes' in a downloadable spreadsheet format. Any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A)(b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme shall be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change

Provisions Relating to GST:

1. GST on investment and advisory fees shall be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52 of the SEBI Regulations.
2. GST on other than investment and advisory fees, if any, shall be charged to the scheme within the maximum limit of TER as per Regulation 52 of the SEBI Regulations.
3. GST on exit load, if any, shall be paid out of the exit load proceeds and exit load net of GST, if any, shall be credited to the scheme.
4. GST on brokerage and transaction cost paid for asset purchases, if any, shall be charged within the limit prescribed under Regulation 52 of the SEBI Regulations.

Illustration of impact of expense ratio on scheme's returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the scheme (including expenses charged). Expenses charged to the scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Illustration:

If the scheme's gross of expenses NAV goes up by 15% over 1 year (for example from 10 to 11.5), and the expense charged for the scheme over that year is 2% of the initial NAV (0.2), the NAV of scheme (net of expenses) at the end of 1 year will come down to 11.3 (11.5 less 0.2) and therefore the net of expenses return for the investor will be 13%.

Waiver of Load for Direct Applications

Pursuant to SEBI Circular no. SEBI/IMD/CIR No.4/ 168230/09 dated June 30, 2009 no entry load will be charged for purchase / additional purchase / switch-in/ SIP/ STP transactions accepted by the Fund.

The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered Distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Transaction Charges

In accordance with SEBI Circular No. Cir/IMD/DF/13/2011 dated August 22, 2011, the distributor (**who has opted in based on type of product**) would be allowed to charge the existing investor a sum of Rs. 100 per subscription of Rs 10,000 and above as transaction charge and Rs. 150 to the first time investor.

No charge can be made for investments below Rs. 10,000. The transaction charge (Rs100/ Rs150) if any, will be deducted by the AMC from the subscription amount and paid to the distributor; and the balance amount will be invested in the Scheme. Thus units will be allotted against the net investment.

There would be no transaction charge on

- (a) transactions other than purchases/ subscriptions relating to new inflows, &
- (b) direct transactions with the Mutual Fund.

The transaction charges are in addition to the existing commission permissible to the distributors.

In case of SIPs, the transaction charge shall be applicable only if the total commitment through SIPs amounts to Rs.10,000/- and above. In such cases the transaction charge shall be recovered in 3 instalments.

Tax Treatment for the Investors' (Unitholders)

Investors are advised to refer to the paragraph on Taxation in the 'Statement of Additional Information' and to consult their own tax advisors with respect to their tax liability and other implications arising out of their participation in the scheme.

For SIP/STP / SWP/ Dividend Sweep transactions:

- The first Account Statement under SIP/STP/ SWP/ Dividend Sweep shall be issued within 10 working days of the initial investment/ transfer.

Consolidated Account Statement (CAS):

In accordance amendment to Regulation 36 of SEBI (Mutual Funds) Regulations, 1996 read with SEBI Circular No. Cir/ IMD/ DF/ 16 / 2011 dated September 08, 2011; SEBI Circular No. CIR/MRD/DP/31/2014 November 12, 2014 the following shall be applicable with respect to dispatch of Consolidated Account Statement (CAS):

- The CAS shall be generated on a monthly basis. The Consolidated CAS across various AMCs shall be delivered by the depositories within ten days from the month end.
- Each CAS issued to the investors shall also provide the total purchase value / cost of investment in each scheme.
- Further, CAS issued for the half-year (ended September/ March) shall also provide
 - The amount of actual commission paid by AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each MF scheme. The term 'commission' here refers to Qall direct monetary payments and other payments made in the form of gifts / rewards, trips, event sponsorships etc. by AMCs/MFs to distributors. Further, a mention may be made in such CAS indicating that the commission disclosed is gross commission and does not exclude costs incurred by distributors such as GST (wherever applicable, as per existing rates), operating expenses, etc.
 - The scheme's average Total Expense Ratio (in percentage terms) for the half-year period for each scheme's applicable plan (regular or direct or both) where the concerned investor has actually invested in.
- Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period
- Where statements are presently being dispatched by email either by the Mutual Funds or by the Depositories, CAS shall be sent through email. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered in the Depository system.

- A CAS shall not be issued to the investor who has not updated their Permanent Account Number (PAN) in their respective folio. Investor may opt out of CAS facility if they do not wish to avail the same.

Note:

- If an applicant so desires, the AMC will issue an Account Statement to the applicant within 5 working days from the receipt of such request without any charges.
- The unitholder may request for a physical Account Statement by writing/calling the AMC/ ISC/ Registrar & Transfer Agent.
- For normal transactions and SIP/ STP/ SWP/ Dividend Sweep transactions as stated above, in the event the account has more than one registered holder, the first-named Unit holder shall receive the Account Statement.
- Where units are held by investor in demat form, the demat statement issued by the Depository Participant will be deemed adequate compliance with the requirements in respect of dispatch of statements of account.
- Investor may opt out of CAS facility if they do not wish to avail the same.
