### **What is an Equity Linked Savings Scheme (ELSS)?**

In respect of Individuals and HUFs, section 80C of the Income Tax Act, 1961 allows a deduction, from total income, of an amount up to Rs.1.5 Lacs of the investment made in certain instruments. The instruments available for such investments, inter-alia, includes the units of any Mutual Fund notified under clause 23(D) of section 10 of the Act provided such units are offered under a plan formulated in accordance with such scheme notified by the Central Government.

In exercise of the powers conferred under Section 80C of the Income Tax Act, 1961, the Central Board of Direct Taxes, (CBDT) has formulated an Equity Linked Savings Scheme, 2005 (ELSS 2005) vide notification dated November 3, 2005. The CBDT has clarified that investments made on or after 1st April, 2005, in plans, which are in accordance with ELSS 1992 or ELSS 1992 as amended in 1998 are also eligible for tax benefit under section 80C of the Income Tax Act, 1961.

Indiabulls Tax Savings Fund shall be launched under Section 88 of the Income Tax Act read with the Equity Linked Savings Scheme, 1992 (ELL 1992) vide notification dated December 28, 1992 and Equity Linked Savings (Amendment) Scheme, 1998 vide notification dated December 22, 1998 issued by the Department of Economic Affairs, Ministry of Finance, Government of India. ## **II. INTRODUCTION**

### ***A. Risk Factors***

#### **i. Standard Risk Factors**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down. As with any investment in stocks, shares and securities, the NAV of the Units under the Scheme can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Indiabulls Tax Savings Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns. While the Scheme will endeavor to declare dividend, however, there is no guarantee or assurance that such dividend will be declared / paid and such declaration / payment is entirely subject to availability of distributable surplus.
- The Sponsor is not responsible or liable for any loss or shortfall in Scheme's corpus arising or resulting from the operation of the Scheme, beyond the initial contribution of Rs. 50,000/- (Rupees Fifty Thousand only) made by it to the Fund at the time of settling the Mutual Fund. The Associates of the Sponsor are not responsible or liable for any loss or shortfall resulting from the operation of the Scheme.
- Indiabulls Tax Savings Fund is not a guaranteed or assured return Scheme.

#### **SCHEME SPECIFIC RISK FACTORS**

1. By virtue of requirements under the ELSS, Units issued under Indiabulls Tax Savings Fund will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realize returns on investments in Indiabulls Tax Savings Fund is consequently restricted for the first three years. Redemption will be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

#### **Risks associated with equity investment**

2. **Market Risk:** The scheme proposes to invest in equity and equity-related securities. Prices, trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity-related securities. Market risk is a risk which is inherent to an equity investment.
3. **Liquidity Risk:** Risk will be monitored in terms of the number of days it takes to liquidate every stock in the portfolio assuming a share of the average volume traded over the previous one year. Efforts would be made to keep the average liquidation period under prudent limits prescribed internally. While securities that are listed on the stock exchange

- carry lower liquidity risk, the ability to sell these investments may be limited by overall trading volumes of the stock exchanges.
4. The scheme may invest up to 5% of its net assets in unlisted equity and equity related instruments and invest in non-publicly offered debt securities, which could affect the liquidity of the scheme.
  5. Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may, however, increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

#### **Risks associated with debt investment**

6. **Interest rate risk:** This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the Net Asset Value of the scheme may be subject to fluctuation. Changes in the interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby possible movements in the NAV. This may expose the scheme to possible capital erosion.
7. **Credit risk or default risk:** This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Default risk / credit risk arises due to an issuer's inability to meet obligations on the principal repayment and interest payments. Because of this risk corporate debentures are sold at a yield above those offered on Government Securities, which are sovereign obligations and free of credit risk. Normally the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.
8. **Market risk:** This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. Market risk is a risk which is inherent to investments in securities. This may expose the scheme to possible capital erosion.
9. **Reinvestment risk:** This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme are reinvested. Investments in debt instruments are subject to reinvestment risks as interest rates prevailing on interest or maturity due dates may differ from the original coupon of the bond, which might result in the proceeds being invested at a lower rate. The additional risk from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed

10. Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk today is a characteristic of the Indian fixed income market.
11. Certain fixed income securities give an issuer the right to call its securities, before their maturity date, in periods of declining interest rates. The possibility of such pre-payment risk may force the fund to re-invest the proceeds of such investments in securities offering lower yields, thereby reducing the fund's interest income.
12. The scheme may invest in non-publicly offered debt securities. This may expose the scheme to liquidity risks.
13. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
14. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme.

#### **Risks associated with derivatives**

15. Derivatives are high risk, high return instruments as they may be highly leveraged. A small price movement in the underlying security could have a large impact on their value and may also result in a loss. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
16. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
17. Interest rate swaps and Forward Rate Agreement require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that the derivative adds to the portfolio and the ability to forecast failure of another party (usually referred to as the "counter-party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives, the credit risk where the danger is that of a counter-party failing to honour its commitment, liquidity risk where the danger is that the derivative cannot be sold at prices that reflect the underlying assets, rates and indices, and price risk where the market price may move in adverse fashion.
18. In case of buying options either call/put, the maximum loss would be the premium paid in case of options expiring out of the money.
19. The risks associated with futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures

- and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
20. The Long position in the Nifty will have as much loss as the gain in the short portfolio if hedged completely and would be vice versa if we were holding long portfolio, short Index.
  21. While Futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time for scheme to purchase or close out a specific futures contract.
  22. The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
  23. The Stock Exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.

#### **Risks associated with Securities Lending**

24. Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

#### **Risks associated with Short-selling of Securities**

25. Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.

#### **Risk Mitigation Factors:**

##### **Equity:**

- Liquidity Risk: The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.

- Concentration Risk: The scheme will endeavour to have a well-diversified equity portfolio comprising stocks across various sectors of the economy. This would aid in managing concentration risk and sector-specific risks.
- Generally, diversification across market cap segments also aids in managing volatility and ensuring adequate liquidity at all times.
- Derivatives Risk: The fund will endeavour to maintain adequate controls to monitor the derivatives transactions entered into.

### **Debt**

- Interest Rate Risk: The Fund seeks to mitigate this risk by keeping the maturity of the scheme in line with the interest rate expectations.
- Credit risk or default risk: The Fund will endeavour to minimise Credit/Default risk by primarily investing in medium-high investment grade fixed income securities rated by SEBI registered credit rating agencies. Historical default rates for investment grade securities (BBB and above) have been low.
- Reinvestment Risk: Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.
- The scheme may take positions in interest rate derivatives to hedge market/interest rate risks.
- Liquidity or Marketability Risk: The fund will endeavour to minimise liquidity risk by investing in securities having a liquid market.

### **B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

#### **FOREIGN ACCOUNT TAX COMPLIANCE ACT (‘FATCA’) AND COMMON REPORTING STANDARDS (CRS) REQUIREMENTS:**

FATCA is a United States of America (“U.S.”) tax initiative that requires all financial institutions to report financial transactions of U.S. persons including entities in which U.S. persons hold a substantial ownership, etc. to the relevant tax authorities. It was introduced by the United States Department of Treasury and the US Internal Revenue Service (“IRS”), the purpose of FATCA is to encourage better tax compliance by preventing U.S. persons from using financial institutions outside U.S. to avoid U.S. taxation on their income and assets.

Further, similar to FATCA, G20 and OECD countries have developed CRS on Automatic Exchange of Information (AEOI). CRS requires the financial institutions of the source jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries.

The Indian Government signed an Inter-Governmental Agreement (“IGA”) with the U.S. on July 9, 2015 to implement the FATCA in India. In addition, India also signed the OECD’s Model Competent Authority Agreement for tax information sharing in accordance with multilateral Common Reporting Standard (“CRS”) on June 3, 2015. India had committed to implement CRS and the same has been implemented from January 1, 2016. The Central Board of Direct Taxes has inserted Section 285BA of the Income Tax Act, 1961 along with Rules 114F to 114H (FATCA-CRS Rules), as part of the Income-tax Rules, 1962. These Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, will relay that information to the IRS and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Indiabulls Mutual Fund. In relevant cases, information will have to be reported to tax authorities i.e. CBDT. Towards compliance, we may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Indiabulls Mutual Fund has taken appropriate measures in order to become FATCA and CRS compliant, with effect from the applicable date as per applicable laws / rules/ regulations. Indiabulls Mutual Fund may also have to comply with other similar laws as and when applicable.

SEBI issued its circular no. CIR/MIRSD/2/2015 dated August 26, 2015 interalia advising intermediaries to take necessary steps to ensure compliance with the requirements specified in the rules and guidelines specified by the Government of India. AMFI also issued its best practices guidelines circular no. 63/2015-16 dated September 18, 2015 on this matter. The AMC and the Mutual Fund are required to adhere to various requirements interalia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities, as specified under the applicable laws.

Accordingly, the following aspects need to be adhered to:

- With effect from November 1, 2015 all investors will have to mandatorily provide the information and declarations pertaining to FATCA/CRS for all new accounts opened, failing which the application / transaction request shall be liable to be rejected.
- For all new accounts opened by investors, from September 1, 2015 till October 31, 2015, MFs need to obtain relevant FATCA declarations. These details / certification need to be obtained by December 31, 2015, particularly in cases where, after India search, a positive match is found with any US indicia. If self-certification is not provided by an investor or the reasonableness of self-certification cannot be confirmed, the account is treated as reportable.

- For accounts opened between July 1, 2014 and August 31, 2015, the Government of India vide its press release dated April 11, 2017 has required that all efforts should be made by the AMC to obtain the self-certification from the investor. Further, in case self-certifications are not provided by unit holders till April 30, 2017, the folios would be blocked, which would mean that the AMC would prohibit the unit holder from effecting any transaction with respect to such folios. For pre-existing accounts (as on December 31, 2015 in case of CRS and June 30, 2014 in case of FATCA), specific investors above specified threshold limits would be required to provide self-certification forms.

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should immediately intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Indiabulls Mutual Fund will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

The AMC reserves the right to change/modify the provisions mentioned above in response to any new regulatory development which may require to do so at a later date.

3. Pending investment of funds of a scheme in the required manner, the scheme may invest the funds in short-term money market instruments or other liquid instruments or both. After three years of the date of allotment of the units, the scheme may hold upto 20 percent of net assets of the plan in short-term money market instruments and other liquid instruments to enable them to redeem investment of those unitholders who would seek to tender the units for repurchase.
4. The Asset Allocation Pattern of the Scheme under normal circumstances would be as under:

<b>Instruments</b>	<b>Indicative allocation (% of Net Assets) (Minimum - Maximum)</b>	<b>Risk Profile (High/ Medium/ Low)</b>
Equity and Equity related instruments as per ELSS guidelines*	80% to 100%	High
Debt, Money Market instruments, Cash and equivalent	0% to 20%	Low to Medium

\*The Scheme may invest upto a maximum of 50% of its net assets in Derivatives

On defensive considerations, the scheme may invest in money market instruments and Fixed Deposits of Scheduled Banks to protect the interest of the investors in the scheme.

The scheme may enter into derivatives in line with the guidelines prescribed by SEBI from time to time. The exposure limit per scrip/instrument shall be to the extent permitted by the SEBI Regulation for the time being in force. These limits will be reviewed by the AMC from time to time.

### **Changes in Asset Allocation Pattern**

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change for short term defensive considerations from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations interalia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos, bank deposits in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time. ### **Risk Mitigation**

The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

The overall volatility of the portfolio would be maintained in line with the objective of the scheme. As the scheme is involved only in cash-futures arbitrage, the portfolio volatility depends on the spread between the cash and the futures prices.

A major part of the scheme is invested in liquid stocks & derivative instruments. The fund manager may also keep some portion of the portfolio in debt and money market instruments and/or cash within the specified asset allocation framework for the purpose of meeting redemptions.

Following exposure limits shall be maintained while dealing in derivative instruments to mitigate the risk,

- The cumulative gross exposure through equity, debt and derivative positions will not exceed 100% of the net assets of the scheme.
- The Scheme will not write options or purchase instruments with embedded written options.
- The total exposure related to option premium paid will not exceed 20% of the net assets of the scheme.
- Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.
- Exposure due to hedging positions will not be included in the above mentioned limits subject to the following,
  - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
  - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 3.
  - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
  - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions will be an entity recognized as a market maker by RBI. The Fund Manager reserves the right to invest in such securities as may be permitted from time to time and which are in line with the investment objectives of the Scheme.

### **(iii) Investment in Equity Derivatives**

As part of the Fund Management process, the Trustee may permit the use of derivative instruments such as index futures, stock futures and options contracts, warrants, convertible securities, swap agreements, Forward Rate Agreement (FRA) or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the scheme.

#### **Futures:**

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instrument on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

SEBI has permitted futures contracts on indices and individual stocks with maturity of 1 month, 2 months and 3 months on a rolling basis. The futures contracts are settled on last Thursday (or immediately preceding trading day if Thursday is a trading holiday) of each month. The final settlement price is the closing price of the underlying stock(s)/index.

#### **Options:**

Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified asset at the agreed price and for this obligation he receives premium. The premium is determined considering number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:

**Call Option** - The option that gives the buyer the right but not the obligation to buy specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option

(known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

#### **(iv) Short Selling Of Securities**

If permitted by SEBI Regulations, the Scheme may engage in short selling of securities in accordance with the guidelines issued by SEBI. Short sale of securities means selling of securities without owning them. The AMC will comply with the guidelines issued by SEBI in this behalf, including reporting obligations and the Trustee will carry out the reviews required under said guidelines.

Engaging in short sale of securities is subject to risks related to fluctuations in market price, and settlement/ liquidity risks.

### **E. WHAT ARE THE INVESTMENT STRATEGIES?**

The AMC will construct the portfolio using bottom up approach and will have the flexibility to invest across the market capitalization. The investment environment, valuation parameters and other investment criteria will determine the allocation and the investment style. The AMC will conduct in-house research in order to identify investable ideas. AMC will evaluate appreciation potential of individual stocks from a fundamental perspective, assess industry and company fundamentals, robustness of business model, sustainability of moat, valuations, quality of management, corporate governance standards etc. The Scheme will have reasonably well diversified Portfolio without being overly diversified.

#### **Portfolio Turnover**

Portfolio turnover is the aggregate volume of purchases and sales as a percentage of the corpus of the Scheme during a specified period of time. The portfolio turnover in the Scheme will be a function of inflows, outflows as well as market opportunities available to the Fund Manager. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolios. It will be the endeavor of the Fund Manager to keep the portfolio turnover rates as low as possible. Active asset allocation would impact portfolio turnover. There may be trading opportunities that present themselves from time to time, where in the opinion of the fund manager, there is an opportunity to enhance the total returns of the portfolio. The fund manager will endeavor to balance the increased cost on account of higher portfolio turnover, if any, with benefits likely to be derived from such an approach.

#### **Borrowing by the Fund**

The Scheme may borrow monies to meet temporary liquidity requirements for the purpose of repurchase or redemption of Units or the payment of interest or dividend to the Unit holders. However, such borrowing shall be restricted to 20% of the net assets of the Scheme and for a

maximum period of six months. The limit of 20% may be revised by the Fund and to the extent the Regulations may permit.

The Fund may raise such borrowings, secured or unsecured, from any person or entity as it may deem fit, including Sponsor or Shareholders of any of their associate / group / affiliate entities or banks, after approval by the Trustee, at market related rates.

### **Stock Lending by the Fund**

Stock Lending involves lending of securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. The Fund can temporarily lend, through an approved intermediary, securities held by the Scheme to reputed counterparties, for a fee, subject to internal norms, if any. This would enable generating better returns on those securities, which are otherwise bought with the intention of holding the same for a longer period of time. The securities lent will be returned by the borrower on the expiry of the stipulated period or the lender can call the same back before its expiry.

The AMC will follow regulatory restrictions as may be prescribed in carrying on the activities of Stock lending. Such lent stock, while they are on-lending, will not be available for sale, and this can result in temporary illiquidity.

The Fund Manager may engage in Stock Lending as per following limits:

- Not more than 20% of the net assets of the Scheme can generally be deployed in Stock Lending.
- Not more than 5% of the net assets of the Scheme can generally be deployed in Stock Lending to any single counter party.

### **Investment by AMC, Sponsor etc.**

The AMC, Trustee Company, Sponsor, Shareholders and their associate companies / entities may, subject to regulatory permissions wherever applicable, invest directly or indirectly in the Scheme from time to time.

The AMC will not charge any fees to the Fund / Scheme in relation to its own investments in the Units of the Scheme as provided under extant regulations, unless regulatory permitted.

#### **D. COMPUTATION OF NAV**

The Net Asset Value (NAV) of a mutual fund is the price at which units of a mutual fund are bought or sold. It is the market value of the fund after deducting its liabilities. The value of all units of a mutual fund portfolio are calculated on a daily basis, from this all expenses are then subtracted. The result is then divided by the total number of units the resultant value is the NAV. NAV is also sometimes referred to as Net Book Value or book Value.

Calculation of NAV Mutual fund assets usually fall under two categories – securities & cash. Securities, here, include both bonds and stocks. Therefore, the total asset value of a fund will include its stocks, cash and bonds at market value. Dividends and interest accrued and liquid assets are also included in total assets. Also, liabilities like money owed to creditors, and other expenses accrued are also included.

The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

**Formula to calculate Net Asset Value (NAV) = (Assets – Debts) / (Number of Outstanding units)**

Here: Assets = Market value of mutual fund investments + Receivables + Accrued Income

Debts = Liabilities + Expenses (accrued) the market value of the stocks & debentures.

The NAV shall be calculated up to two decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Option. The NAVs of the Growth Option and the Dividend Option will be different after the declaration of the first dividend.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated for all the Business Days.

### **Rounding off policy for NAV:**

For this Scheme, NAV will be declared upto four decimals. However, there can be no assurance that the investment objective of the scheme will be achieved.

### **Sale Price:**

Sale price is a price at which the fund house sells / offers mutual fund units to investors; this is nothing but the NAV of the respective Scheme of Mutual Fund. For investor who wants to invest in Mutual Fund, the units are offered at NAV of the respective Scheme of Mutual Fund.

**For Example** – If investor A wants to invest Rs. 5,000/- in XYZ Scheme of Mutual Fund. The NAV of Mutual Fund Scheme XYZ is Rs. 15 per unit. Investor's Investments & Mutual Fund unit allocation in Scheme XYZ is calculated as follows:-

$$\begin{aligned}\text{Investment of Investor A} &= \text{Investment Amount} / \text{Sale Price} \\ &= 5,000 / 15 \\ &= 333.3333 \text{ units}\end{aligned}$$

This means investor A will be allocated **333.3333 units** of Mutual Fund Scheme XYZ.

### **Repurchase Price:**

Repurchase price is a price at which fund house repurchases the mutual fund units back from the investor. For investor who wants to redeem his mutual fund units, the units are repurchased at respective scheme NAV less Exit Load (If Applicable)

**For Example** - If Mutual Fund Scheme XYZ is having NAV of Rs. 15 & Exit Load of 1% then the repurchase price would be calculated as follow:

$$\begin{aligned}\text{Repurchase Price} &= \text{NAV} * (1 - \text{Exit Load \%}) \\ &= 15 * (1 - 0.01) \\ &= 14.8500\end{aligned}$$

This means the investor will realise **Rs. 14.8500** per unit if he redeems from Mutual Fund Scheme XYZ.

In case of no exit load the NAV & repurchase price are same.

The Direct Plan shall have lower expense ratio compared to the Regular Plan and no commission shall be paid out of the Direct Plan.

The current expense ratios will be updated on the AMC website viz. [www.indiabullsamc.com](http://www.indiabullsamc.com) on daily basis under a separate head 'Total Expense Ratio of Mutual Fund Schemes' in a downloadable spreadsheet format. Any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A)(b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme shall be communicated to investors of the scheme through notice via email or SMS at least three working days prior to effecting such change.

These estimates have been made in good faith as per the information available and estimates made by the Investment Manager/AMC and are subject to change inter-se or in total subject to prevailing SEBI Regulations. The AMC may incur actual expenses which may be more or less than those estimated above under any head and/or in total and may charge expenses under any of the different heads given under Regulation 52(2) & 52(4) of the SEBI (MF) Regulations (hereinafter called as SEBI Regulations). 2. GST on other than investment and advisory fees, if any, shall be charged to the scheme within the maximum limit of TER as per Regulation 52 of the SEBI Regulations.
3. GST on exit load, if any, shall be paid out of the exit load proceeds and exit load net of GST, if any, shall be credited to the scheme.
4. GST on brokerage and transaction cost paid for asset purchases, if any, shall be charged within the limit prescribed under Regulation 52 of the SEBI Regulations.

**Illustration of impact of expense ratio on scheme's returns**

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the scheme (including expenses charged). Expenses charged to the scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Illustration:

If the scheme's gross of expenses NAV goes up by 15% over 1 year (for example from 10 to 11.5), and the expense charged for the scheme over that year is 2% of the initial NAV (0.2), the NAV of scheme (net of expenses) at the end of 1 year will come down to 11.3 (11.5 less 0.2) and therefore the net of expenses return for the investor will be 13%.

## C. LOAD STRUCTURE

Load is an amount which is presently paid by the investor to redeem the Units from the Scheme. This amount is used by the AMC to pay commissions to the distributors and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, investors may refer to the website of the AMC ([www.indiabullsamc.com](http://www.indiabullsamc.com)) or may call at 1-800-200-7777 (*toll free no.*) or you can contact your distributor.

Type of Load	Load Chargeable (as %age of NAV)
Entry Load#	Not Applicable
Exit Load	Nil

#Pursuant to SEBI Circular No. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009, no entry load will be charged for purchase/ additional purchase/switch in/ SIP/ STP transactions accepted by the Fund. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

The above mentioned load structure shall be equally applicable to the special products such as SIP, STP, SWP, switches, etc. offered by the AMC. However, no load shall be imposed for switching between Options within the Scheme.

### Transaction Charges

In accordance with SEBI Circular No. Cir/ IMD/ DF/13/ 2011 dated August 22, 2011 the following are the terms and conditions relating to Transaction Charges:

1. The Distributor (**who has opted in based on type of product**) would be allowed to charge the Mutual Fund Investor a Transaction Charge where the amount of investment is Rs. 10,000/- and above per subscription.
2. For existing investors in a Mutual Fund, the Transaction Charge allowed will be Rs. 100/- per subscription of Rs. 10,000/- and above.  
For a first-time investor in a Mutual Fund, the Transaction Charge allowed will be Rs. 150/- per subscription of Rs. 10,000/- and above.
3. The Transaction Charge, where applicable based on the above criteria, will be deducted by the AMC from the subscription amount remitted by the Investor and paid to the distributor; and the balance (net) amount will be invested in the Scheme. Thus units will be allotted against the net investment.
4. In case of SIPs, the transaction charge shall be applicable only if the total commitment through SIPs amounts to Rs. 10,000/- and above. In such cases the transaction charge shall be recovered in 3 installments
5. No Transaction charges shall be levied:
  - a) Where the investor purchases the Units directly from the Mutual Fund.
  - b) Where the amount of investment is below Rs. 10,000/- per subscription.

c) On transactions other than purchases/ subscriptions relating to new inflows. Switch-in / Transfer / Transmission of units/ Dividend reinvestment Units will not be considered as subscription for the purpose of levying the transaction charge.

6. The terms and conditions relating to transaction charges shall be part of the application form in bold print.

7. The statement of account shall clearly state that the net investment as gross subscription less transaction charge and give the number of units allotted against the net investment.

The transaction charges are in addition to the existing system of commission permissible to the Distributors. The transaction charges will be compliant with SEBI Circular, dated August 22, 2011.

### **Transaction Charges payable to distributors in respect of transactions routed through BSE Star MF Platform/ NSE NMF II Platform**

As per SEBI's circular no. CIR/ IMD/ DF/ 13/ 2011 dated August 22, 2011, read with circular no. CIR/ IMD/ DF/ 21/ 2012 dated September 13, 2012, mutual fund distributors (MFDs) are allowed to levy transaction charges @ ` 150/ ` 100 per transaction in respect of new/ existing clients. Transactions routed through Stock Exchanges are not covered/ considered for this purpose.

In this regard, it is clarified that ARN holders who have 'opted-in' for levy of transaction charges in terms of above referred SEBI circulars are eligible for transaction charges in respect of mutual fund transactions in respect of their clients routed through stock exchange platforms viz. BSE Star MF/ NSE NMF II platforms, as well.

For avoidance of doubt, it is reiterated there is no change in the guidelines for mutual fund transactions routed through stock exchanges through stock brokers.

### **The Investor is requested to check the prevailing Load structure and Transaction charges of the Scheme before investing.**

The AMC/Trustee reserve the right to change/ modify the Load structure if it so deems fit, subject to SEBI Regulations. The AMC/Trustee may charge additional load/expense or any other charge (by whatever name called) to the Scheme/Unit Holders on a prospective basis, as may be permitted under the SEBI Regulations. Any imposition or enhancement in the Load shall be applicable on prospective investments only. At the time of changing the Load structure, the AMC shall follow the below mentioned measures to avoid complaints from investors about investment in the Scheme without knowing the Loads:

(i) The addendum detailing the changes shall be attached to the SID and Key Information Memorandum. The addendum shall be circulated to all the distributors/brokers so that the same can be attached to all SID and Key Information Memoranda already in stock. The addendum shall also be sent along with the newsletter sent to the Unit Holders immediately after the changes.

(ii) Arrangements shall be made to display the addendum to the SID in the form of a notice in all the ISCs and distributors/brokers office.

(iii) The introduction of the Load alongwith the details shall be stamped in the acknowledgement slip issued to the investors on submission of the Application Form and shall also be disclosed in the statement of accounts issued after the introduction of such Load.

(iv) A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated.

(v) Any other measure which the Mutual Fund may feel necessary.

The Redemption Price will not be lower than 93% of the applicable NAV. Any enhancement or imposition of load in future shall be applicable on prospective investments only.
